

Who is Epiphany Community Services?

Epiphany Community Services (ECS) is an experienced evaluation and training firm that serves members nationwide with a focus on members in under-served areas. ECS provides support in all areas of organizational development, capacity development and evaluation.

Since its inception, ECS has focused on building long-term relationships with its members to provide the most effective service to all the communities served.

What is Coalition Evaluation?

Coalition evaluation enables coalitions to tell their story by demonstrating the impact on community problems and the ability to address emerging needs.

Who Does ECS Work With?

ECS currently evaluates and supports more than 50 community coalitions in 14 states.

What are the Outcomes of ECS Clients?

The coalition's efforts exemplify the focus and positive outcomes made when communities take responsibility for their communities.

Through their work, overall substance use rates are **decreasing** because:

- Fewer people have access to prescription drugs without a prescription
- Fewer kids have access to alcohol
- Kids are receiving consistent messages about the dangers of substance abuse
- Schools are taking an active role in setting consistent policies and enforcement of substance use in communities
- Employers are developing and implementing Drug Free Work Place Programs
- Dangerous new drugs such as K2 Spice (synthetic marijuana) have been outlawed

“Epiphany (Community) Services has been a tremendous resource for our coalition and community. Staff has been available for questions, trainings and overall support. We consider ECS to be a wonderful asset to our coalition.”

– Amy Haskins, Jackson County Anti-Drug Coalition, Ripley, West Virginia
