The collection of secondary and primary data will enable an accurate and complete picture of the needs of the community.

#### **Secondary Data Collection**

Secondary data refers to data that was collected by someone other than the user.

## **Secondary Data sources may include:**

- Substance abuse treatment admissions;
- Emergency room/trauma admissions;
- Child abuse reports;
- Adult crime reports;
- Juvenile crime reports;
- Poison control reports;
- Suicide hotline:
- EMS or fire department runs;
- Missing child reports;
- 211 calls:
- Teen pregnancy rates;
- School discipline reports;
- Sexual assault reports;
- Traffic safety reports;
- Census data:
- Existing community assessments;
- Community funding priorities;
- School surveys.

#### **Primary Data Collection**

Primary data refers to data that is collected by the user.

### **Primary Data sources may include:**

- Key informant interviews;
- Focus groups;
- Parent surveys;
- Community surveys.

The next two pages provide information on where to find these data sources and a checklist for tracking collection.

**Practical Solutions to Complex Problems**
