

getting to outcomes

Epiphany Community Services is a practical evaluation and technical assistance firm. We partner with our clients to make positive changes in their communities and build the future they desire. Our mission is to bring practical solutions to complex problems.

We Assist our Clients by Offering:

- Evaluation
- Training
- Organizational Development
- Data Collection
- Technological Solutions

Our Clients' Accomplishments:

ECS helps our clients plan their work, track their outcomes, and tell their story to their communities. Our clients are developing sustainable, diverse community partnerships that are nationally recognized as outstanding.

Community Changes:

With ECS services, many clients see a drastic increase in the number of community changes they accomplish per year.

Millions of media impressions across all platforms

Building Capacity: Bringing communities together

"Epiphany Community Services has provided valuable Evaluation and Technical Assistance services to the Champaign County Drug Free Youth Coalition in the last few years. The ECS team met us where we were at developmentally as a coalition and have been there each step of the way guiding us as we have evolved as an organization. They have offered us constructive feedback, support, and held us accountable to our mission and vision. Their support and assistance have been instrumental to our success in achieving desired outcomes."

Stacey Logwood, Champaign County Drug Free Youth Coalition
